

Digital Still Camera

PRODUCT HIGHLIGHTS

- 14 Megapixels
- Slim body design with 12x long zoom
- 3.5" LCD touch screen

So slim, so much power, so effortless to use:
a sleek sharpshooter – whatever your target.

It's easy to wield WB210 and take full advantage of its amazing range. The far-reaching 12x optical zoom records in detail what you can barely see, while the 24mm wide-angle Schneider lens captures the broader landscape. Review your highly detailed 14 Megapixel stills and HD-quality movies shot in 720p, all played back on an impressively large 3.5" LCD touch screen.

Voice recording: Mono

FEATURES

Optical Image Stabilization: When shooting in low light, zooming in on a shot, or when your camera or camcorder is unsteady, Optical Image Stabilization helps eliminate blurry results. This feature stabilizes your photos by changing their path to the image sensor before they are recorded digitally. Your photos come out sharp and in-focus.

Movie recording: Record movies in the palm of your hand.

Smart Touch 3.0: Touch, drag, click: the intuitive Smart Touch 3.0 is a quick and easy way to control the many advanced functions in Samsung's new line of compact cameras. Like a smartphone touch screen, just a few touches on the large, clear LCD screen lets you control app-style icons, flip through photos and more.

Smart Auto 2.0: Using your selected shoot mode, Smart Auto takes perfect shots automatically, based on lighting and other conditions.

Smart Filter 2.0: Change the mood of stills and movies with special-effects filters, such as Half Tone Dot and Old Movie.

Face Detection: Your camera does the work for you by detecting and adjusting the lighting on up to nine different faces at one time.

Beauty Shot/Self Portrait: Position yourself in the frame, with dark circles and blemishes automatically removed.

Multi Slide Show function: Lets you arrange pictures into a slide show and add music.

Smart Crop: After shooting an item – such as a building or poster – at an angle, use the Smart Crop feature to alter the image to appear as if it were shot straight on. Simply select four crop points on the image, and it automatically reappears, recropped full frame, from the desired angle.

Portrait Highlight: Samsung's smart Portrait Highlight technology makes everyone photograph looking their absolute best – automatically, every time.

Magic Frame Shot: Now you can create artistic, framed photo postcards and posters right in the camera. First select one of the Magic Frame Shot templates, then take the shot. Both images will automatically be combined in a perfectly framed shot, ready to share with friends and family.

Intelli-Studio: Built-in advanced editing software gives you the freedom to play, edit and share files on any PC. Intelli-Studio even starts up automatically – simply plug into any PC via the USB input.

CONNECTIONS

OS: Windows XP/Vista/7, 250MB (over 1GB recommended)

PC connection: USB port

SYSTEM REQUIREMENTS

Windows: Windows 2000/XP/Vista, Intel Pentium 4, 3.2GHz or later/AMD Athlon 64FX, 2.6GHz or later. Minimum 512MB RAM (1GB). Windows XP/ VISTA 7, 250 MB (over 1GB recommended). CD-ROM Drive, USB 2.0, Microsoft 9.0c or later, over 1024x768 pixels, 16 bit color monitor or later
